PROFESSIONAL SUMMARY

Aspiring Data Scientist with expertise in Python, Machine Learning, and Data Analysis. Skilled in building AI solutions, interactive dashboards, and predictive models, with hands-on experience in tools like Tableau and TensorFlow. Passionate about leveraging data to solve real-world challenges.

EDUCATION

Chhatrapati Shahu Ji Maharaj University

Kanpur, India Oct 2021 - June 2025

B.Tech - Computer Science Engineering

EXPERIENCE / INTERNSHIP

Ekak Innovation (ML Engineer)

- Collaborating on industrial-level project development as part of a team.

Dec 2024 - Present

(Kanpur, Uttar Pradesh, India)

Earth5R (Data Scientist)

June 2024 - Sep 2024 (Remote)

- Collaborated with a team to develop a Command Line Interface (CLI) application and independently designed and developed an HR Dashboard using Tableau.

Ybi foundation (Data Scientist)

Jan 2024 - Feb 2024 (Remote)

- Built a machine learning model achieving 83% accuracy for spam email classification.

Oasis Infobyte (Python Developer)

Nov 2023 - Dec 2023 (Remote)

- Created a web-based URL shortening application with enhanced usability.

PROJECTS

Sentiment analysis on mental health (Ongoing)

[GitHub](#)

- It classifies mental health-related text into six categories: Suicidal, Stress, Normal, Depression, Bipolar, and Anxiety.

Brain Tumor Classification Using Deep Learning

[GitHub](#)

- Technology Used : Python, TensorFlow, Keras, Data Augmentation, CNN.
- Developed a model using VGG19 with data augmentation for enhanced tumor detection and achieved 82% accuracy through advanced image preprocessing and model optimization.

HR Dashboard using Tableau

[Tableau](#)

- Designed an interactive HR dashboard tableau, analyzing employee demographics, performance, and salary trends to support data-driven decision-making.

AI Gym Tracker and Pose Detector

[GitHub](#)

- Technology Used : Python, OpenCV, Media-pipe.
- Developed a gym tracking app that automatically counts exercise rounds and achieves 85% accuracy.

Olympics Analysis Project

[GitHub](#)

- Technology Used : Data Analysis, Python, Streamlit, Pandas, Plotly.
- Built a Streamlit-based web app to analyze Olympic performance and athlete statistics from 1896 to 2016, offering interactive visualizations and insights

SKILLS

Data Science and Machine Learning : Python, NLP, Data Visualization, Data Preprocessing, Supervised Learning algos, Unsupervised Learning algos, ANN, CNN, RNN, Feature Engineering, Feature Selection and Extraction, Exploratory Data Analysis, Computer Vision.

Mathematics for ML and DL : Algebra, Probability, Statistics, Calculus, Matrices.

Python packages and Frameworks : Scikit-Learn, TensorFlow, Keras, OpenCV, NumPy, Pandas, Matplotlib, Seaborn.

Cloud Deployment and Containers : AWS (EC2, S3), Streamlit.io, Netlify, Git, Dropbox, Docker, render, Google cloud, Django.

Other : Tableau, PowerBI, MSEXcel.

CERTIFICATIONS

- Data science - Cisco Networking Academy
- Data Analysis - Cisco Networking Academy

- Machine Learning - Simplilearn
- Python - GreatLearning

- Gen AI (Ongoing)
- LLMs (Ongoing)
